

RIGHT DATA. RIGHT PEOPLE. IMMEDIATE INSIGHT.

Introducing BIGfish BI, the first web-based business analytics solution designed specifically for small and mid-sized law firms and integrated with the Tabs3 billing and accounting platform. For years, law firm owners and managers have been looking for a better way to explore firm performance more efficiently; Enter BIGfish BI. Whether using one of over 20 prebuilt dashboards right out of the box or creating and sharing new reports or dashboards using our self-service module, BIGfish users enjoy unparalleled ease-of-use. Gone are the days of compiling information into spreadsheets for analysis and presentation. So many firms have difficult compensation formulas or profit analysis requirements that take days or weeks to prepare. BIGfish provides the platform to automate these tasks once and for all.

KEY BENEFITS

Eliminate manual keying to get data into required format

Created for business users not database administrators or developers

Security assures users only see what they are supposed to see

Attorneys can get to the data from anywhere

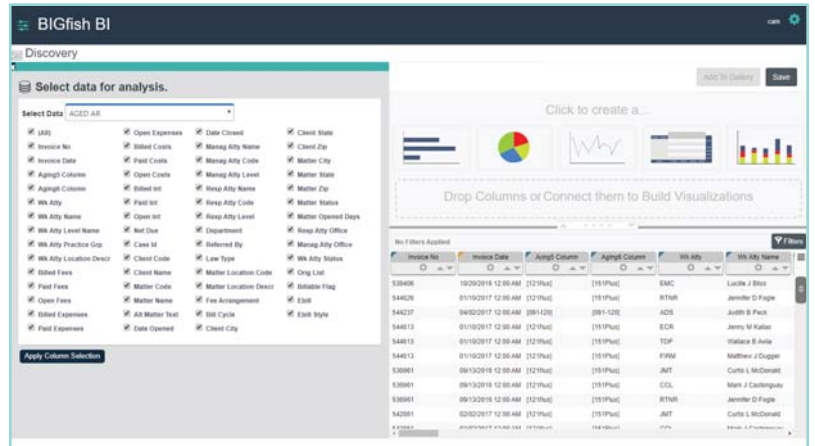

Run most dashboards in under 5 seconds
