DOCUMENT MANAGEMENT

netdocuments®
The secure platform that allows for easy creation, viewing, editing, and sharing of documents on any desktop, tablet, or mobile device without having to worry about data at risk.

ndOffice™
Integrations with Microsoft Office and Adobe Acrobat enable users to simply and securely open documents from NetDocuments, work natively in MS Office or Adobe Acrobat, and save work products back to NetDocuments.

netdocuments® OCR™
Extracts text from PDFs and images to make document content searchable inside NetDocuments.

EMAIL MANAGEMENT

ndMail™
Matter-based cloud email management solution that leverages artificial intelligence to save, file, and manage emails to NetDocuments.

ndMail™ FOR OUTLOOK DESKTOP
Import email from Outlook desktop into NetDocuments using predictive email filing, folder mapping, or drag-and-drop functions. Complete file access is also available within Outlook desktop.

ndMail™ FOR OFFICE 365 ADD-IN
for Office 365 add-in
Leverage global, cloud-based filing predictions when you use Outlook on any browser or device, including Mac.

PRODUCTIVITY OPTIMIZATION

ndThread™
Real-time communication around projects and matters, document annotation, and direct messaging platform.

SetBuilder™
Compiles and organizes individual documents into structured sets in one location, publishable as a single, hyperlinked PDF for easy digital distribution.

CollabSpaces™
Simply, intuitively, and securely share content in NetDocuments with external users in a matter- or project-centered way.

Products

SECURITY AND GOVERNANCE

Security Center	Consolidates key security controls for administrators in one place such as geo-aware storage, compliance-as-a-service resources, encryption key management, and DLP.
Data Loss Prevention (DLP)	Prevent data loss before it occurs with platform-level control over actions based on configurable classifications and policies.
ndMirror™	Stores complete, up-to-date local copies of all your cloud-secured documents and metadata to a customer-controlled server.

TOOLS

ndFlexStore™	Enables document storage in alternative locations, solves the long-standing issue of data residency, document locality, and co-mingling of content matters.
App Store	Access hundreds of integrated applications to address specific business needs including meta data cleaning, document comparison, workflow, and more.
AI Marketplace	Selected integrated applications for targeted machine learning to support contract analytics, business agreements, and clause extraction.
